

SDG Goal 17 Partnerships for the goals

SDG Target 17.19 By 2030, build on existing initiatives to develop measurements of progress on sustainable development that complement gross domestic product, and support statistical capacity-building in developing countries

SDG Indicator 17.19.1 Dollar value of all resources made available to strengthen statistical capacity in developing countries

1. Name of data series	
ODA and OOF (commitments) of all resources made available to strengthen statistical capacity in developing countries	
Compliant with SDG metadata: yes, partly	SDG Metadata

2. Definition of indicator
<p>The data series measures German official development assistance (ODA) and other official flows for statistical capacity building. It is measured in gross commitments of the resources to the partner country (versus disbursements of resources).</p> <p>Official development assistance (ODA) is defined as aid provided by official agencies that promotes and specifically targets the economic development and welfare of developing countries.</p> <p>Other official flows (OOF) are defined as transactions by the official sector which do not meet the conditions for eligibility as ODA, either because they are not primarily aimed at development, or because they are not sufficiently concessional.</p> <p>For these flows data on the sector of destination is recorded using 5-digit codes so called purpose codes. Statistical capacity building is identified by the purpose code 16062. It covers statistical capacity building both in national statistical offices as well as in other government ministries.</p>
3. Comparison with SDG metadata (as of 12/07/2017)
<p>The data series provided is partly compliant with the global SDG Metadata. The global SDG Metadata is based on ODA and OOF commitments (which is provided here) as well as further studies and an online survey carried out by PARIS21. Hence the data presented here is expected to be lower than the figures reported by PARIS21.</p>

4. Data description
<p>ODA is the resource flows to countries and territories on the OECD Development Assistance Committee (DAC) List of ODA Recipients and to multilateral development institutions that are:</p> <ul style="list-style-type: none"> i. Provided by official agencies, including state and local governments, or by their executive agencies; and ii. Concessional (i.e. grants and soft loans) and administered with the promotion of the economic development and welfare of developing countries as the main objective. <p>The DAC list of countries eligible to receive ODA is updated every three years and is based on per capita income.</p>
5. Calculation method
Not applicable

6. Unit of measure	Mn USD, constant prices (2016)
--------------------	--------------------------------

7. Timeliness	8. Frequency
t + 11 months	Annual
9. Last regular revision	10. Revised period
Not applicable	Not applicable

11. Accessibility of source data
OECD Development Finance Data: http://oe.cd/fsd-data
12. Metadata on source data
General information on ODA as well as recent and future changes in methodology: http://www.oecd.org/dac/financing-sustainable-development/development-finance-standards/What-is-ODA.pdf List of the OECD DAC purpose codes: http://www.oecd.org/dac/financing-sustainable-development/development-finance-standards/purposecodessectorclassification.htm List of ODA recipient countries: http://oe.cd/dac-list
13. Related SDG data series (duplicate indicators or sub-indicators to same indicator)
17.19.1 ODA and OOF (gross disbursements) of all resources made available to strengthen statistical capacity in developing countries 17.2.1 Proportion of net ODA to GNI 17.2.1 Proportion of bilateral and imputed multilateral net ODA for LDCs to the GNI

SDG Goal 17 Partnerships for the goals

SDG Target 17.19 By 2030, build on existing initiatives to develop measurements of progress on sustainable development that complement gross domestic product, and support statistical capacity-building in developing countries

SDG Indicator 17.19.1 Dollar value of all resources made available to strengthen statistical capacity in developing countries

1. Name of data series	
ODA and OOF (gross disbursements) of all resources made available to strengthen statistical capacity in developing countries	
Compliant with SDG metadata: no	SDG Metadata

2. Definition of indicator
<p>The data series measures German official development assistance (ODA) and other official flows for statistical capacity building. It is measured in gross disbursements of the resources to the partner country (versus commitments of resources).</p> <p>Official development assistance (ODA) is defined as aid provided by official agencies that promotes and specifically targets the economic development and welfare of developing countries.</p> <p>Other official flows (OOF) are defined as transactions by the official sector which do not meet the conditions for eligibility as ODA, either because they are not primarily aimed at development, or because they are not sufficiently concessional.</p> <p>For these flows data on the sector of destination is recorded using 5-digit codes so called purpose codes. Statistical capacity building is identified by the purpose code 16062. It covers statistical capacity building both in national statistical offices as well as in other government ministries.</p>
3. Comparison with SDG metadata (as of 12/07/2017)
<p>The global SDG Metadata is based on ODA and OOF commitments as well as further studies and an online survey carried out by PARIS21. The data series provided is based on disbursements and hence not compliant with the global SDG Metadata. A corresponding data series on commitments is provided separately. Furthermore, the data presented here is expected to be lower than the figures reported by PARIS21, especially considering that this data series reflects disbursements.</p>
