

## SDG Goal 14 Life below water

**SDG Target 14.5** By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information

**SDG Indicator 14.5.1** Coverage of protected areas in relation to marine areas

1. Name of data series	
<b>Protected marine areas</b>	
Compliant with SDG metadata: yes	<a href="#">SDG Metadata</a>

2. Definition of indicator
The indicator measures the protected marine area in relation to the total marine area.
3. Comparison with SDG metadata (as of 11/07/2017)
The indicator is compliant with the SDG metadata.

4. Data description	
For the calculation of the marine area under protection, protected areas as defined in the IUCN categories I to VI are considered. Data was provided by the Federal Agency of Nature Conservation upon request. Areas taken into account for the calculation were marine, coastal and transitional waters, as defined in the German surface water ordinance.	
5. Calculation method	
$\text{Protected marine areas} = \frac{\text{Protected marine areas in marine, coastal, and transitional waters}}{\text{Total area of marine, coastal, and transitional waters}} * 100$	
6. Unit of measure	%

7. Timeliness	8. Frequency
Not applicable	Annual
9. Last regular revision	10. Revised period
Not applicable	Not applicable

11. Accessibility of source data
Data on protected areas was provided by the Federal Agency of Nature Conservation upon request. The map with the protected areas is available here: <a href="https://geodienste.bfn.de/schutzgebiete?lang=en">https://geodienste.bfn.de/schutzgebiete?lang=en</a>
12. Metadata on source data
Not available, because indicator is based on a special evaluation
13. Related SDG data series (duplicate indicators or sub-indicators to same indicator)
Not applicable

## SDG Goal 14 Life below water

**SDG Target 14.5** By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information

**SDG Indicator 14.5.1** Coverage of protected areas in relation to marine areas

1. Name of data series	
<b>Marine Key Biodiversity Areas (KBAs) covered by protected areas</b>	
Compliant with SDG metadata: yes	<a href="#">SDG Metadata</a>

2. Definition of indicator	
The indicator measures the proportion of marine Key Biodiversity Areas (KBAs) that is covered by protected areas.	
3. Comparison with SDG metadata (as of 11/07/2017)	
The indicator is compliant with the SDG metadata.	

4. Data description	
For the calculation of the marine area under protection, protected areas as defined in the IUCN categories I to VI are considered. Data on protected areas and Key Biodiversity areas was provided by the Federal Agency of Nature Conservation upon request. Areas taken into account for the calculation where marine, coastal and transitional waters, as defined in the German surface water ordinance.	
5. Calculation method	
<p style="text-align: center;"><b>Marine Key Biodiversity Areas covered by protected areas =</b></p> $\frac{\text{Protected marine Key Biodiversity Areas}}{\text{Total area of marine Key Biodiversity Areas}} * 100$	
6. Unit of measure	%

7. Timeliness	8. Frequency
Not applicable	Annual
9. Last regular revision	10. Revised period
Not applicable	Not applicable
