

SDG Goal 4 Quality education

SDG Target 4.6 By 2030, ensure that all youth and a substantial proportion of adults, both men and women, achieve literacy and numeracy

SDG Indicator 4.6.1 Proportion of population in a given age group achieving at least a fixed level of proficiency in functional (a) literacy and (b) numeracy skills, by sex

1. Name of data series	
Adult population achieving at least level I of proficiency in functional literacy	
Compliant with SDG metadata: yes, sub-indicator	SDG Metadata

2. Definition of indicator
The indicator measures the share of adult population who achieve a minimum level in literacy. The population between 16 and 65 years of age is defined as adults. The achievement is assessed by the Programme for the International Assessment of Adult Competencies (PIAAC) by the OECD. The minimum level is set to be level 1 of the PIAAC scale.
3. Comparison with SDG metadata (as of 17/07/2017)
The indicator covers only the literacy part of the SDG indicator and only pictures the proportion of the population with at least a proficiency level of 1 in the PIAAC.

4. Data description	PIAAC has been planned as an ongoing program with a first cycle of assessment between 2008 and 2019. A second cycle is scheduled between 2018 and 2023. In the first cycle, 29 countries have been and are involved. PIAAC assesses adults' aged 16-65 literacy, numeracy and problem-solving skills. The data for the indicator is taken from the test results of the literacy part of PIAAC.	
5. Calculation method	$\text{Share of adults} = \frac{\text{adults achieving PIAAC literacy level I and above (number)}}{\text{total adults (number)}} \times 100$	
6. Unit of measure		%

7. Timeliness	8. Frequency
t + 12 months	Irregular
9. Last regular revision	10. Revised period
