

## SDG Goal 17 Partnerships for the goals

**SDG Target 17.1** Strengthen domestic resource mobilization, including through international support to developing countries, to improve domestic capacity for tax and other revenue collection

**SDG Indicator 17.1.1** Total government revenue as a proportion of GDP, by source

1. Name of data series	
<b>Proportion of total government revenue to GDP</b>	
Compliant with SDG metadata: yes, but based on ESA 2010	<a href="#">SDG Metadata</a>

2. Definition of indicator
The indicator measures the proportion of the total government revenue from taxes, social contributions, sales of goods and services as well as other current and capital revenues to the gross domestic product.
3. Comparison with SDG metadata (08/06/2018)
The time series is compliant with the UN metadata, but is based on the European System of Accounts (ESA 2010) and not the Government Finance Statistics Manual 2014.

4. Data description	<p>The indicator thereby calculates the proportion of the total government revenue from taxes, social contributions, sales of goods and services as well as other current and capital revenues to the gross domestic product. The data on government revenue is classified based on the <a href="#">European System of Accounts</a>.</p> <p>The data on GDP is calculated by the Federal Statistical Office's National Accounts as a secondary statistic. GDP is adjusted based on a price base changing every year (previous year's price base). After several revisions due to new data input, final results are available four years after the first preliminary release.</p> <p>Besides the regular revisions of the time series (see below) a general revision of the European System of Accounts was conducted in 2014.</p>
5. Calculation method	$\text{Total government revenue to GDP} = \frac{\text{Government revenue (Bn EUR)}}{\text{GDP (Bn EUR)}} \times 100$
6. Unit of measure	%

7. Timeliness	8. Frequency
t + 45 day	Annual
9. Last regular revision	10. Revised period
08/2018	2014-2017
