

**SDG Goal 3 Good health and well-being**
**SDG Target 3.1 By 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births**
**SDG Indicator 3.1.2 Proportion of births attended by skilled health personnel**

1. Name of time series	
<b>Child deliveries in hospitals</b>	
Compliant with global metadata: yes, partly	<a href="#">Global Metadata</a>
2. Definition of time series	
The time series includes all child deliveries in hospitals. These births are attended by skilled health personnel like doctors, nurses or midwives.	
3. Comparison with global metadata (as of 09/07/2017)	
<p>The time series is only partly compliant with the numerator of the global metadata as it only includes child deliveries in hospitals. Child deliveries that are attended by skilled health personal can also take place as home births. Voluntarily reported data of home births do exist, but the data are not consistent with the data of the hospital statistics of the Federal Statistical Office.</p> <p>Additionally, this time series includes children that are born dead, and the age of the mother is not limited from 15 to under 50 years of age as the global metadata request.</p>	
4. Data description	
The data cover women who gave birth in a German hospital in the year under review, regardless of their place of residence. The data on child deliveries in hospitals are derived from hospital statistics (mandatory census). The survey is conducted by the Federal Statistical Office.	
5. Calculation method	
$\text{Child deliveries in hospitals} = \sum \text{Women who gave birth in hospitals [number]}$	
6. Unit of measure	number
7. Timeliness	8. Frequency
t + 9 months	Annual
9. Last regular revision	10. Revised period
Not applicable	Not applicable
11. Accessibility of source data	
Child deliveries in hospitals (number and percentage). Classification: years, region, type of child delivery <a href="http://www.gbe-bund.de/gbe10/i?i=480:5096E">http://www.gbe-bund.de/gbe10/i?i=480:5096E</a>	
12. Metadata on source data	
Quality report of hospital statistics (only available in German): “Grunddaten der Krankenhäuser” <a href="https://www.destatis.de/DE/Methoden/Qualitaet/Qualitaetsberichte/Gesundheit/einfuehrung.html">https://www.destatis.de/DE/Methoden/Qualitaet/Qualitaetsberichte/Gesundheit/einfuehrung.html</a>	

## SDG Goal 3 Good health and well-being

**SDG Target 3.1** By 2030, reduce the global maternal mortality ratio to less than 70 per 100,000 live births

**SDG Indicator 3.1.2** Proportion of births attended by skilled health personnel

1. Name of time series	
<b>Live births in Germany</b>	
Compliant with global metadata: no	<a href="#">Global Metadata</a>
2. Definition of time series	
The time series includes all live births of women whose place of residence is in Germany.	
3. Comparison with global metadata (as of 09/07/2017)	
<p>The time series offers additional information. It includes the total number of live births in Germany instead of the total number of child births. Due to multiple births the numbers of live births will be higher than the number of mothers giving birth.</p> <p>Additionally, the age of the mother is not limited from 15 to under 50 years of age as the global metadata request.</p>	
4. Data description	
The data on registered live births is derived from birth statistics (administrative data). All children are included that are born alive and whose mothers have their place of residence in Germany. The survey is conducted by the Federal Statistical Office.	
5. Calculation method	
$\text{Live births in Germany} = \sum \text{Live births of women with residence in Germany [number]}$	
6. Unit of measure	Number
7. Timeliness	8. Frequency
t + 9 months	Annual
9. Last regular revision	10. Revised period
Not applicable	Not applicable
11. Accessibility of source data	
<p>Live births – GENESIS online, table 12612-0001</p> <p><a href="https://www-genesis.destatis.de/genesis//online?operation=table&amp;code=12612-0001&amp;bypass=true&amp;language=de">https://www-genesis.destatis.de/genesis//online?operation=table&amp;code=12612-0001&amp;bypass=true&amp;language=de</a></p>	
12. Metadata on source data
