SDG Goal 17 Partnerships for the goals

SDG Target 17.9 Enhance international support for implementing effective and targeted capacity-building in developing countries to support national plans to implement all the sustainable development goals, including through North-South, South- South and triangular cooperation

SDG Indicator 17.9.1 Dollar value of financial and technical assistance (including through North-South, South-South and triangular cooperation) committed to developing countries

1. Name of data series
ODA and OOF (commitments) to developing countries for capacity building and national planning (without South-South cooperation)
Compliant with SDG metadata: yes   **SDG Metadata**

2. Definition of indicator
The data series measures German official development assistance (ODA) and other official flows (OOF) for capacity building and national planning. It is measured in commitments of the resources to the partner country (versus disbursements of resources).
Official development assistance (ODA) is defined as aid provided by official agencies that promotes and specifically targets the economic development and welfare of developing countries. For ODA flows, data on the sector of destination are recorded using 5-digit codes so called purpose codes. Codes ending on the sequential number 10 refer to policy, planning and programs and the codes 16020 and 16030 to employment and housing policy and their administrative management. The following codes are hence included in the time series: 11110, 12110, 13010, 14010, 15110, 15210,16020, 16030, 21010, 22010, 23110, 24010, 31110, 31210, 31310, 32110, 32210, 32310, 33110, 33210, 41010.
Other official flows (OOF) are defined as transactions by the official sector, which do not meet the conditions for eligibility as ODA, either because they are not primarily aimed at development, or because they are not sufficiently concessional.
Data on South-South cooperation is – in line with the global SDG Metadata- not included.
3. Comparison with SDG metadata (as of 12/07/2017)
The data series provided is compliant with the global SDG Metadata. However it does not exclude triangular coorperation. It is important to note that the global SDG Metadata does not include neither South-South nor triangular cooperation as outlined in the indicator. The global SDG metadata furthermore does not specify the necessary purpose codes.

4. Data description
ODA is the resource flows to countries and territories on the OECD Development Assistance Committee (DAC) List of ODA Recipients and to multilateral development institutions that are:
i. Provided by official agencies, including state and local governments, or by

SDG Goal 17 Partnerships for the goals

SDG Target 17.9 Enhance international support for implementing effective and targeted capacity-building in developing countries to support national plans to implement all the sustainable development goals, including through North-South, South- South and triangular cooperation

SDG Indicator 17.9.1 Dollar value of financial and technical assistance (including through North-South, South-South and triangular cooperation) committed to developing countries

1. Name of data series
ODA and OOF (gross disbursements) to developing countries for capacity building and national planning (without South-South cooperation)
Compliant with SDG metadata: yes   **SDG Metadata**

2. Definition of indicator
The data series measures German official development assistance (ODA) and other official flows (OOF) for capacity building and national planning. It is measured in gross disbursements of the resources to the partner country (versus commitments of resources). Official development assistance (ODA) is defined as aid provided by official agencies that promotes and specifically targets the economic development and welfare of developing countries. For ODA flows, data on the sector of destination are recorded using 5-digit codes so called purpose codes. Codes ending on the sequential number 10 refer to policy, planning and programs and the codes 16020 and 16030 to employment and housing policy and their administrative management. The following codes are hence included in the time series: 11110, 12110, 13010, 14010, 15110, 15210,16020, 16030, 21010, 22010, 23110, 24010, 31110, 31210, 31310, 32110, 32210, 32310, 33110, 33210, 41010.
Other official flows (OOF) are defined as transactions by the official sector, which do not meet the conditions for eligibility as ODA, either because they are not primarily aimed at development, or because they are not sufficiently concessional.
Data on South-South cooperation is – in line with the global SDG Metadata- not included.
3. Comparison with SDG metadata (as of 12/07/2017)
The data series provided is compliant with the global SDG Metadata. However it does not exclude triangular coorperation. It is important to note that the global SDG Metadata does not include neither South-South nor triangular cooperation as outlined in the indicator. The global SDG metadata furthermore does not specify the necessary purpose codes.
